github.com/shri-ram07 | Portfolio

PROFESSIONAL SUMMARY

Founding AI Engineer with 1+ year of production experience in agentic AI and LLM systems. Shipped an autonomous ads optimization agent using Google Gemini, MCP tool servers, and multi-tenant FastAPI microservices on Google Cloud at 1,000+ concurrent users, with applied computer vision experience in action recognition and 3D medical image segmentation.

TECHNICAL SKILLS

Languages and Backend: Python, SQL, Java, C, FastAPI, Flask, REST APIs, OAuth2 authentication, microservices

Agentic AI and LLMs: Google Gemini API, Model Context Protocol (MCP), LLM orchestration, prompt engineering, Retrieval-Augmented Generation (RAG), agent memory, n8n workflow automation

ML and Computer Vision: TensorFlow, PyTorch, Keras, Scikit-Learn, CNNs, LSTMs, Transformers, autoencoders, 3D U-Net, OpenCV, MediaPipe

Cloud, DevOps and Data: Google Cloud Platform (Cloud Run, Compute Engine), Docker, CI/CD pipelines, Git, MySQL, Pandas, NumPy

PROFESSIONAL EXPERIENCE

Founding AI Engineer, Ryze AI | *San Francisco, CA (Remote)* **Jun 2025 - Jul 2026**

- Architected and shipped the end-to-end agentic AI pipeline for a production Ads Specialist Agent, integrating Google Gemini with Google Ads, Meta Ads, and Google Analytics APIs for autonomous campaign optimization and budget allocation.
- Engineered MCP (Model Context Protocol) servers standardizing LLM orchestration and secure agent tool access across advertising platform APIs.
- Scaled a multi-tenant FastAPI microservices backend to 1,000+ concurrent users with RESTful integrations, session management, and OAuth2 authentication.
- Owned production deployment and operations on Google Cloud (Cloud Run, Compute Engine), sustaining high availability, low latency, and cost-efficient auto-scaling.
- Designed prompt engineering frameworks and a persistent agent memory system enabling automated ad strategy generation, multi-step reasoning, and long-term context retention.

AI Intern, Realfy Oasis | *Bengaluru, India (Remote)* **Mar 2025 - Jun 2025**

- Delivered real-time action recognition achieving 92%+ accuracy in multi-person pose tracking and gesture classification using ST-GNN, LSTM, Transformers, and MediaPipe.
- Shipped agentic automation pipelines combining n8n workflows with LLMs for intent classification and autonomous task execution, reducing manual intervention by 70%.
- Deployed facial authentication pipelines processing 500+ daily verifications at 98% accuracy for secure access control.
- Built autoencoder based anomaly detection flagging abnormal movements in surveillance and fitness datasets, cutting false positive rates by 40%.

PROJECTS

Chronicle: Autonomous Research Agent | Google Gemini API | LINK **Jan - Feb 2026**

- Built an autonomous research agent that converts a single research goal into multi-format analytical reports via a self-correcting 8-phase pipeline of 75+ targeted searches with real-time web grounding.

NeuroInsight AI: 3D Brain Tumor Segmentation | TensorFlow, 3D U-Net | LINK **Aug - Nov 2025**

- Designed a 3D U-Net deep learning model for brain tumor segmentation and ROI detection in volumetric MRI scans, achieving high Dice Similarity Coefficient scores on the BraTS benchmark dataset.

DeepFake Detector: Image Authenticity Classifier | TensorFlow, OpenCV, Flask | LINK **Jan - Feb 2025**

- Developed a CNN based classifier that labels uploaded images as real or fake with 95%+ accuracy across 10,000+ authentic and manipulated face images, served via a Flask web app.

Fake News Detection: NLP Text Classifier | NLTK, TF-IDF, Scikit-Learn | LINK **Dec 2024**

- Built an NLP based fake news classifier achieving high F1 scores on a 20,000+ article dataset through automated text preprocessing, TF-IDF vectorization, and supervised classification.

EDUCATION

- **B.Tech, Computer Science (AI/ML)** | Kalinga University, Raipur | CGPA: 9.46/10 **2027**
- **Jawahar Navodaya Vidyalaya, Satna (CBSE)** | Higher Secondary (Class XII) **2022**

CERTIFICATIONS AND ACHIEVEMENTS

- Certifications: Google Cloud Generative AI Leader (GAIL); HackerRank Python, SQL, C; AI/ML (Teach Nook).
- Won 1st place among 50+ teams in the Intra-Institutional Startup Competition; built AI/ML solutions in 3 national 24-hour hackathons (Kalinga Hackathon, Hackomania, HackGenX).
